## CORPORATE SOCIAL INVESTMENT POLICY

As an international resource Company, Adavale Resources understands it is a guest in the countries in which it operates. As such, the Company respects the culture and customs of those countries and is committed to fully integrate into the communities that may be impacted by its activities. The Company is committed to achieving this via its corporate social investment initiatives.

Adavale's social investment programs will be tailored to be more than just 'a token gesture.' They will be driven by our values so the community realises genuine and lasting benefits from Adavale's presence.

Where the required skills are available, we recruit from the surrounding community. Similarly, where price and quality are acceptable, our policy is to purchase locally, supporting the local economy.

In further developing our Corporate Social Investment Plan, we will utilise the process of 'Participatory Rural Appraisals' ensuring the Community has full involvement and ownership of all projects that we partner in. Our considered areas of involvement will include health, education and sustainable projects in other sectors that benefit our community.
