## ENVIRONMENTAL POLICY

Adavale Resources Limited is committed to maintaining a culture of environmental care and responsibility through its Board and Officers leading by example and considering the environment in each decision it makes. As an international resource company, we are cognisant that our shareholders, employees and the communities in which we operate have a right to expect responsible environmental management.

As such, the Company is committed to:

- Complying with environmental legislation and regulations as the baseline for our environmental performance and striving to achieve best practice in every aspect.
- Managing our operations to minimize or eliminate negative environmental impacts wherever practicable.
- Conducting business with service providers and contractors who have a similar commitment to the environment and who embrace our environmental policy.
- Striving for the most efficient use of energy and water, the prevention of pollution and minimising waste by recycling wherever possible.
- Recognising that each generation is merely the custodian of the environment for the next and as such rehabilitating our sites to internationally accepted standards.

Embracing the principle of environmental care being part of the Adavale culture and considered in everything we do, will underpin our success as a responsible resource company, without compromising the ability of future generations to meet their needs.
