These statements are based on an assessment of present economic and operating conditions, and on a number of assumptions regarding future events and actions that, as at the date of this Prospectus, are expected to take place.

Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the Company, the Directors and the Company's management.

Overseas shareholders

This Offer does not, and is not intended to, constitute an offer in any place or jurisdiction in which, or

to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

For further information on overseas Shareholders please refer to Section 2.9.

Continuous disclosure obligations

The Company is a "disclosing entity" (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Securities.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the three months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

Please refer to Section 6.2 for further details.

No documents or other information available on the Company's website is incorporated into this Prospectus by reference.

Financial forecasts

The Directors have considered the matters set out in ASIC Regulatory Guide 170 and believe that they do not have a reasonable basis to forecast future earnings on the basis that the operations of the Company are inherently uncertain. Accordingly, any forecast or projection information would contain such a broad range of potential outcomes and possibilities that it is not possible to prepare a reliable best estimate forecast or projection.

Clearing House Electronic Sub-Register System (CHES) and Issuer Sponsorship

The Company will apply to participate in CHES, for those investors who have, or wish to have, a sponsoring stockbroker. Investors who do not wish to participate through CHES will be issuer sponsored by the Company.

Electronic sub-registers mean that the Company will not be issuing certificates to investors. Instead, investors will be provided with

statements (similar to a bank account statement) that set out the number of Securities issued to them under this Prospectus. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures under CHES and issuer sponsorship.

Electronic sub-registers also mean ownership of securities can be transferred without having to rely upon paper documentation. Further monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month.

As announced on 27 July 2022, the Company is conducting a placement and non-renounceable entitlement offer in order to raise up to approximately \$3,000,000 (before costs).

It is anticipated that the Placement Shares will be issued on 4 August 2022 pursuant to the Company's available placement capacity under ASX Listing Rules 7.1 and 7.1A, as well as subject to shareholder approval at a General Meeting. The Directors of the Company intend to participate for a total of approximately \$100,000 in the

A subscription price of \$0.001 per option will be payable on the these Options.

Further details on the Lead Manager are available at Sections 1.7 and 6.4.1

1.4 Key Risk Factors

Prospective investors should be aware that subscribing for Securities involves a number of risks and an investment in the Company should be considered as highly speculative. The future performance of the Company and the value of the Securities may be influenced by a range of factors, many of which are largely beyond the control of the Company and the Directors. The key risks associated with the Company's business, the industry in which it operates and general risks applicable to all investments in listed securities and financial markets generally are set out in Section 5.

1.5 Directors' Interests in Securities

The relevant interest of each of the Directors in the Securities of the Company as at the date of this Prospectus, together with their respective Entitlement, is set out in the table below:

Director	Shares	Options ¹	Performance Rights	Entitlement	\$
Mr David Riekie ⁴	2,000,000	2,000,000	3,700,000 ²	333,333	6,667
Mr Grant Pierce ⁵	3,399,658	2,000,000	3,200,000 ³	566,610	11,332
Mr John Hicks ⁶	1,028,710	2,000,000	3,200,000 ³	171,452	3,429

2. *Comprising 1,500,000 Performance Rights expiring on 30 June 2023 and 2,200,000 Performance Rights expiring on 31 December 2023.*
3. *Comprising 1,000,000 Performance Rights expiring on 30 June 2023 and 2,200,000 Performance Rights expiring on 31 December 2023.*
4. *Held by Mr Riekie, Wilhaja Pty Ltd as Trustee for the Riekie Family A/C (a company which Mr Riekie is a director and beneficiary), Riekie Superannuation Pty Ltd < Superfund A/C > (a fund which Mr Riekie is a beneficiary) and Equity Plan Services Pty Ltd (a trust which Mr Riekie is a beneficiary).*

6. *Held by Mr Hicks, Nambour Valley Pty Ltd < Nordes Family A/C > (a company in which Mr Hicks is a director) and Equity Plan Services Pty Ltd (a trust which Mr Hicks is a beneficiary).*

The Board recommends all Eligible Shareholders take up their Entitlements. The Directors intend to participate in the Entitlement Offer and take up their entire Entitlement as set out in the table above.

1.6 Details of Substantial Holders

Based on publicly available information as at the date of this Prospectus, there are no persons which (together with their associates) have a relevant interest in 5% or more of the Shares.

In the event all Entitlements are accepted there will be no change to the substantial holders on completion of the Offer.

The effect on the Control of the Company in the event that Shareholders do not participate in the Offer is further described in Section 1.8 below.

1.7 Lead Manager

Discovery Capital Pty Limited (**Lead Manager**) has been appointed as the lead manager of the Offer. Terms of the Lead Manager mandate and total fees payable are set out in Section 6.4.1.

1.8 Effect on Control

Based on current shareholding and Entitlements of Shareholders (including substantial Shareholders) as at the date of this Prospectus, regardless of the amount raised under the Offer, no Shareholder will increase their holding, to an amount in excess of 19.9% through applying for their Entitlements.

Further as set out in Section 2.6, on the basis of the allocation policy, no person will acquire, through participation in the Shortfall Offer a holding of Shares of, or increase their holding to, an amount in excess of 19.9% of all the Shares on issue on completion of the Offer.

Further there will be no change to any Shareholder's voting power as a result of the issue of the New Options. Where the New Options are exercised into Shares, the voting power of the Shareholders who exercise the New Options will increase. The likelihood of the New Options being exercised is dependent on the price of Shares from time to time until the New Options expire.

1.9 Potential dilution on non-participating Shareholders

In addition to potential control impacts set out in Section 1.8, Shareholders should note that if they do not participate in the Offer, their holdings are likely to be diluted by approximately 16.67% (as compared to their holdings and number of Shares on issue as at the date of this Prospectus).

No immediate dilution will occur as a result of the issue of the New Options under this Prospectus. However subsequent exercise of any or all of the New Options will result in dilution. Assuming all New Options offered pursuant to this Prospectus are issued and exercised into Shares, Shareholders who do not participate in the Offer, are likely to be diluted by an aggregate of approximately 3.92% (as compared to their holdings and number of Shares on issue as at the date of the Prospectus).

For illustrative purposes, the table below shows how the dilution may impact the holdings of Shareholders:

Holder	Holding as at Record date	% at Record Date ¹	Entitlements under the Offer	Holdings if Offer not taken Up	% post Offer
Shareholder 1	10,000,000	2.79	1,666,667	10,000,000	2.40
Shareholder 2	5,000,000	1.39	833,333	5,000,000	1.20
Shareholder 3	1,500,000	0.42	250,000	1,500,000	0.36
Shareholder 4	400,000	0.11	66,667	400,000	0.10
Shareholder 5	50,000	0.013	8,333	50,000	0.01

Notes:

- This is based on a share capital of 357,327,587 Shares as at the date of the Prospectus and not including the Shares to be issued under the Placement and assumes no Options currently on issue or other Shares are issued including New Options or Performance Rights are exercised.*
- The dilutionary effect shown in the table is the maximum percentage on the assumption that those Entitlements not accepted by Eligible Shareholders are placed under the Shortfall Offer. In the event all Entitlements are not accepted and some or all of the resulting Shortfall was not subsequently placed, the dilution effect for each Shareholder not accepting their Entitlement would be a lesser percentage.*

The Offer is being made as a pro-rata non-renounceable entitlement issue of one (1) Share for every six (6) Shares held by Eligible Shareholders registered at the Record Date at an issue price of \$0.02 per Share together with one (1) free Option for every three (3) Shares subscribed for and issued. Fractional entitlements will be rounded up to the nearest whole number.

2.3 Payment options

(a) By BPAY®

For payment by BPAY®, please follow the instructions on the Entitlement and Acceptance Form. You can only make a payment via BPAY® if you are the holder of an account with an Australian financial institution that supports BPAY® transactions. Please note that should you choose to pay by BPAY®:

- (i) you do not need to submit the Entitlement and Acceptance Form but are taken to have made the declarations on that Entitlement and Acceptance Form;
- (ii) if you do not pay for your Entitlement in full, you are deemed to have taken up your Entitlement in respect of such whole number of Shares which is covered in full by your Application monies; and
- (iii) if you pay more than is required to subscribe for your Entitlement, you will be taken to have applied for Shortfall Securities (if any) under the Shortfall Offer, to the extent of the excess.

You should be aware that your own financial institution may implement earlier cut-off times with regard to electronic payment, and you should therefore take this into consideration when making payment. **It is your responsibility to ensure that funds submitted through BPAY® are received by 5:00pm (WST) on the Closing Date. The Company shall not be responsible for any delay in the receipt of the BPAY® payment.**

Guidance where you have more than one CRN (Shareholding of Shares)

If you have more than one shareholding of Shares and consequently receive more than one Entitlement and Acceptance Form, when taking up your Entitlement in respect of one of those Shareholdings only use the CRN specific to that Shareholding as set out in the applicable Entitlement and Acceptance Form. **Do not use the same CRN for more than one of your Shareholdings.** This can result in your Application monies being applied to your Entitlement in respect of only one of your Shareholdings (with the result that any Application in respect of your remaining Shareholdings will not be valid).

(b) By Electronic Funds Transfer (overseas applicants)

For payment by Electronic Funds Transfer (EFT) for overseas Eligible Shareholders, please follow the instructions on the Entitlement and Acceptance Form. You can only make a payment via EFT if you are the holder of an account that supports EFT transactions to an Australian bank account. Please note that should you choose to pay by EFT:

- (i) you do not need to submit the Entitlement and Acceptance Form but are taken to have made the declarations on that Entitlement and Acceptance Form;

- (ii) if you do not pay for your Entitlement in full, you are deemed to have taken up your Entitlement in respect of such whole number of Shares which is covered in full by your Application monies; and
- (iii) if you pay more than is required to subscribe for your Entitlement, you will be taken to have applied for Shortfall Securities (if any) under the Shortfall Offer, to the extent of the excess.

(c) **Other payment Methods and Refunds**

Payment will only be accepted by BPAY® or EFT (only for overseas Applicants) and receipts for payment will not be issued. Cash, bank drafts and cheques will not be accepted.

2.4 Implications of an acceptance

Returning a completed Entitlement and Acceptance Form or paying any Application monies by BPAY® or EFT will be taken to constitute a representation by you that:

- (a) you have received a copy of this Prospectus and the accompanying Entitlement and Acceptance Form, and read them both in their entirety;
- (b) you acknowledge that once the Entitlement and Acceptance Form is returned, or a BPAY® or EFT payment instruction is given in relation to any Application monies, the application may not be varied or withdrawn except as required by law.

2.5 Minimum subscription

There is no minimum subscription.

2.6 Shortfall Offer

Any Entitlement not taken up pursuant to the Offer will form the Shortfall Offer (**Shortfall Securities**). The Shortfall Offer is a separate offer made pursuant to this Prospectus and will remain open for up to three months following the Closing Date. The issue price for each Share to be issued under the Shortfall Offer shall be \$0.02 per Share being the price at which Shares have been offered under the Offer.

If you do not wish to take up any part of your Entitlement you are not required to take any action. That part of your Entitlement not taken up will form part of the Shortfall Offer and potentially be allocated to other Eligible Shareholders or other third parties as part of the Shortfall Offer. The Shortfall Offer will only be available where there is a Shortfall between applications received from Eligible Shareholders and the number of Shares proposed to be issued under the Offer.

Related Parties, including Directors, are not entitled to participate in the Shortfall Offer.

The Board presently intends to allocate Shortfall Securities as follows:

- (a) to Eligible Shareholders who apply for an excess of their full Entitlement, so long as the issue of Shortfall Securities to that Eligible Shareholder would not take their voting power to in excess of 19.99%; and then

- (b) to other parties identified by the Directors, which may include parties who are not currently Shareholders.

Depending on the level of demand for Shortfall, the Company may also engage with brokers to seek to place the Shortfall Shares.

No Shares will be issued to a party under the Shortfall Offer if the effect would be to increase that party's voting power in the Company to an amount greater than 19.99%.

The Company reserves the right to issue an Eligible Shareholder a lesser number of Shortfall Securities than applied for or no Shortfall Securities at all. However, the Directors do not intend to refuse an application for Shortfall Securities from Eligible Shareholders other than in circumstances of oversubscription or where acceptance may result in a breach of the Corporations Act. If the number of Shortfall Securities applied for by Eligible Shareholders exceeds the total Shortfall, the Shortfall Securities will be allocated among applying Eligible Shareholders proportionate to their existing holdings.

All decisions regarding the allocation of Shortfall Securities will be made by the Directors and will be final and binding on all applicants under the Shortfall Offer; as such there is no guarantee that any Shortfall Securities applied for will be issued to Eligible Shareholders.

The Company will have no liability to any Applicant who receives less than the number of Shortfall Securities they applied for under the Shortfall Offer. If the Company scales back any applications for Shortfall Securities under the Shortfall Offer any Application monies will be returned (without interest) as soon as practicable.

Eligible Shareholders resident in jurisdictions outside Australia should note that their participation in the Shortfall Offer may be restricted by Australia's foreign investment laws. The Company reserves the right to not issue Shortfall Shares to an Eligible Shareholder where it reasonably believes that doing so may infringe on Australia's foreign investment laws.

2.7 ASX listing

Application for Official Quotation of the Shares offered pursuant to this Prospectus will be made in accordance with the timetable set out at Section 1. If ASX does not grant Official Quotation of the Shares offered pursuant to this Prospectus before the expiration of three months after the date of issue of the Prospectus, (or such period as varied by the ASIC), the Company will not issue any Shares and will repay all Application monies for the Shares within the time prescribed under the Corporations Act, without interest.

The fact that ASX may grant Official Quotation to the Shares is not to be taken in any way as an indication of the merits of the Company or the Shares now offered for subscription.

The Company will not apply for Official Quotation of the New Options issued pursuant to this Prospectus.

2.8 Issue of Securities

Securities issued pursuant to the Offer will be issued in accordance with the ASX Listing Rules and timetable set out at Section 1.

Securities issued pursuant to the Shortfall Offer will be issued on a progressive basis. Where the number of Securities issued is less than the number applied for, or where no issue is made surplus Application monies will be refunded without any interest to the Applicant as soon as practicable after the closing date of the Shortfall Offer.

Pending the issue of the Securities or payment of refunds pursuant to this Prospectus, all Application monies will be held by the Company in trust for the Applicants in a separate bank account as required by the Corporations Act. The Company, however, will be entitled to retain all interest that accrues on the bank account and each Applicant waives the right to claim interest.

Holding statements for Securities issued under the Offer will be mailed as soon as practicable after the issue of Securities and for Shortfall Securities issued under the Shortfall Offer as soon as practicable after their issue.

2.9 Overseas shareholders

This Offer does not, and is not intended to, constitute an offer in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus. In particular, the new Shares may not be offered or sold in any country outside Australia, except to the extent permitted below.

New Zealand

This offer to New Zealand investors is a regulated offer made under Australian and New Zealand law. In Australia, this is Chapter 8 of the Corporations Act and regulations made under that Act. In New Zealand, this is subpart 6 of Part 9 of the Financial Markets Conduct Act 2013 and Part 9 of the Financial Markets Conduct Regulations 2014.

This Offer and the content of the Prospectus are principally governed by Australian rather than New Zealand law. In the main, the Corporations Act and the regulations made under that Act set out how the Offer must be made.

There are differences in how financial products are regulated under Australian law. For example, the disclosure of fees for managed investment schemes is different under the Australian regime.

The rights, remedies, and compensation arrangements available to New Zealand investors in Australian financial products may differ from the rights, remedies, and compensation arrangements for New Zealand financial products.

Both the Australian and New Zealand financial markets' regulators have enforcement responsibilities in relation to this Offer. If you need to make a complaint about this Offer, please contact the Financial Markets Authority, New Zealand (<http://www.fma.govt.nz>). The Australian and New Zealand regulators will work together to settle your complaint.

The taxation treatment of Australian financial products is not the same as for New Zealand financial products.

If you are uncertain about whether this investment is appropriate for you, you should seek the advice of an appropriately qualified financial adviser.

The Offer may involve a currency exchange risk. The currency for the financial products is not New Zealand dollars. The value of the financial products will go up or down according to changes in the exchange rate between that currency and New Zealand dollars. These changes may be significant.

If you expect the financial products to pay any amounts in a currency that is not New Zealand dollars, you may incur significant fees in having the funds credited to a bank account in New Zealand in New Zealand dollars.

If the financial products are able to be traded on a financial product market and you wish to trade the financial products through that market, you will have to make arrangements for a participant in that market to sell the financial products on your behalf. If the financial product market does not operate in New Zealand, the way in which the market operates, the regulation of participants in that market, and the information available to you about the financial products and trading may differ from financial product markets that operate in New Zealand.

3. PURPOSE AND EFFECT OF THE OFFER

3.1 Purpose of the offer

The purpose of the Offer is to raise up to \$1,200,000 before costs.

The funds raised from the Offer are intended to be applied in accordance with the table set out below:

2.	Lake Surprise Project in South Australia ²	170,000	14.17
3.	Working capital ³	100,000	8.33
4.	Expenses of the Offer ⁴	73,000	5

- RC and diamond drill program to test targets identified through the Heli EM at the Nickel Projects; and

In the event the Offer is not fully subscribed, operational objectives are likely to be modified, which may result in delay or substantial changes to the Company's future plans. In this event (and after accounting for associated Offer costs) it is likely that the Company will appropriate scale back funds available for project work (items 1 and 2 in the Notes above) and general working capital.

The above table is a statement of the Board's current intentions as of the date of this Prospectus. However, Shareholders should note that as with any budget, intervening events including exploration success or failure, market and general economic conditions, as well as new circumstances, have the potential to affect the manner in which the funds are ultimately applied. The Board reserves the right to alter the way funds are applied on this basis.

4.1 Rights and liabilities attaching to Shares

The following is a summary of the more significant rights and liabilities attaching to the Shares being offered pursuant to this Prospectus. This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Shareholders. To obtain such a statement, persons should seek independent legal advice.

Full details of the rights and liabilities attaching to Shares are set out in the Constitution, a copy of which is available for inspection at the Company's registered office during normal business hours.

(a) General meetings

Shareholders are entitled to be present in person, or by proxy, attorney or representative to attend and vote at general meetings of the Company.

Shareholders may requisition meetings in accordance with section 249D of the Corporations Act and the Constitution of the Company.

(b) Voting rights

Subject to any rights or restrictions for the time being attached to any class or classes of shares, at general meetings of shareholders or classes of shareholders:

- (i) each Shareholder entitled to vote may vote in person or by proxy, attorney or representative;
- (ii) on a show of hands, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder has one vote; and
- (iii) on a poll, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder shall, in respect of each fully paid Share held by him, or in respect of which he is appointed a proxy, attorney or representative, have one vote for each Share held, but in respect of partly paid shares shall have such number of votes as bears the same proportion to the total of such Shares registered in the Shareholder's name as the amount paid (not credited) bears to the total amounts paid and payable (excluding amounts credited).

(c) Dividend rights

Subject to the rights of any preference Shareholders and to the rights of the holders of any shares created or raised under any special arrangement as to dividend, the Directors may from time to time declare a dividend to be paid to the Shareholders entitled to the dividend which shall be payable on all Shares according to the proportion that the amount paid (not credited) is of the total amounts paid and payable (excluding amounts credited) in respect of such Shares.

The Directors may from time to time pay to the Shareholders any interim dividends as they may determine. No dividend shall carry interest as against the Company. The Directors may set aside out of the profits of the Company any amounts that they may determine as reserves, to be applied at the discretion of the Directors, for any purpose for which the profits of the Company may be properly applied.

Subject to the ASX Listing Rules and the Corporations Act, the Company may, by resolution of the Directors, implement a dividend reinvestment plan on such terms and conditions as the Directors think fit and which provides for any dividend which the Directors may declare from time to time payable on Shares which are participating Shares in the dividend reinvestment plan, less any amount which the Company shall either pursuant to the Constitution or any law be entitled or obliged to retain, be applied by the Company to the payment of the subscription price of Shares.

The liquidator may, with the authority of a special resolution, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any shares or other securities in respect of which there is any liability.

(e) **Shareholder liability**

As the Shares issued will be fully paid shares, they will not be subject to any calls for money by the Directors and will therefore not become liable for forfeiture.

(f) **Transfer of shares**

(g) **Future increase in capital**

The issue of any new Shares is under the control of the Directors of the Company. However subsequent exercise of any or all of the New Options will result in dilution. Assuming all New Options offered pursuant to this</p>

Risk Category	Risk
	<p>Prospectus are issued and exercised into Shares, Shareholders who do not participate in the Offer, are likely to be diluted by an aggregate of approximately 3.92% (as compared to their holdings and number of Shares on issue as at the date of the Prospectus).</p> <p>It is not possible to predict what the value of the Company, a Share or an Option will be following the completion of the Offer being implemented and the Directors do not make any representation as to such matters.</p> <p>The last trading price of Shares on ASX prior to the Prospectus being lodged of \$0.026 is not a reliable indicator as to the potential trading price of Shares after implementation of the Offer.</p>
Going Concern	<p>The Company's Financial Report for the Half-Year Ended 30 December 2021 (Financial Report) includes a note on the financial condition of the Company and the possible existence of a material uncertainty about the Company's ability to continue as a going concern.</p> <p>The Financial Report was prepared on a going concern basis which contemplates continuity of normal business activities and the realisation of assets and settlement of liabilities in the normal course of business. The Company incurred a net loss from continuing operations of \$2,787,020 for the period ended 31 December 2021.</p> <p>Notwithstanding the 'going concern' qualification included in the Financial Report, the Directors believe that upon the successful completion of the Offer, the Company will have sufficient funds to adequately meet the Company's current exploration commitments and short-term working capital requirements. However, it is highly likely that further funding will be required to meet the medium to long-term working capital costs of the Company.</p> <p>In the event that the Offer is not completed successfully there is significant uncertainty as to whether the Company can continue as a going concern which is likely to have a material adverse effect on the Company's activities.</p>
Political (Tanzania) Risks	<p>The Company's operations at Kabanga Jirani Nickel Project and Luhuma Nickel Project are both located in Tanzania and will be subject to the various political, economic and other risks and uncertainties associated with operating in that country. These risks and uncertainties include, but are not limited to, economic, social or political instability or change, hyperinflation, currency non-convertibility or instability and changes of law affecting government participation, taxation, working conditions, rates of exchange, exchange control, exploration licensing, export duties, environmental protection, mine safety, labour relations as well as</p>

Risk Category	Risk
	<p>government control over mineral properties or government regulations that require the employment of local staff or contractors or require other benefits to be provided to local residents. The Company may also be hindered or prevented from enforcing its rights with respect to a governmental instrumentality because of the doctrine of sovereign immunity.</p> <p>Any future material adverse changes in government policies or legislation in Tanzania that affect foreign ownership, mineral exploration, development or mining activities, may affect the viability and profitability of the Company. Operations may be affected in varying degrees by government regulations with respect to, but not limited to, restrictions on exploration, development, mining production, price controls, export controls, currency remittance, income taxes, foreign investment, maintenance of claims, environmental legislation, land use, land claims of local people, water use, local economic empowerment or similar policies, employment, contractor selection and mine safety. Failure to comply strictly with applicable laws, regulations and local practices relating to mineral right applications and tenure, could result in loss, reduction or expropriation of entitlements. The occurrence of these various factors adds uncertainties that cannot be accurately predicted and could have an adverse effect on the Company's operations or profitability.</p> <p>The legal systems in Tanzania may be less developed than in more established countries, which may result in risks such as political difficulties in obtaining effective legal redress in the courts whether in respect of a breach of law or regulation, or in an ownership dispute; a higher degree of discretion on the part of governmental agencies; the lack of political or administrative guidance on implementing applicable rules and regulations including, in particular, as regards to local taxation and property rights; inconsistencies or conflicts between and within various laws, regulations, decrees, orders and resolutions, or relative inexperience of the judiciary and courts in such matters.</p> <p>The commitment by local business people, governmental officials and agencies and the judicial system to abide by legal requirements and negotiated agreements may be more uncertain, creating particular concerns with respect to licences and agreements for the Company. These may be susceptible to revision or cancellation and legal redress may be uncertain or delayed. There can be no assurance that joint ventures, licences, licence applications or other legal arrangements will not be adversely affected by the actions of the government authorities or others and the effectiveness and enforcement of such arrangements cannot be assured.</p>

Risk Category	Risk
	<p>There can be no guarantee that the Company will be able to generate a positive return for its shareholders if an event occurs in Tanzania which materially adversely affects the value of the Company, its assets and/or its business.</p>
<p>Environmental Health and Safety matters</p>	<p>The Company's mining operations will be subject to extensive Australian health and safety and environmental laws and regulations which could impose significant costs and burdens on the Company (the extent of which cannot be predicted). These laws and regulations provide for penalties and other liabilities for violation of such standards and if established, in certain circumstances, obligations to rehabilitate current and former facilities and locations where operations are or were conducted. Permission to operate could be withdrawn temporarily where there is evidence of serious breaches of health and safety and environmental laws and regulations and even permanently in the case of extreme breaches.</p> <p>Environmental laws in Tanzania are strict. Every activity from exploration through to mining requires compliance with the regulations for environmental protections in section 81 of the Environmental Management Act, 2004. Under section 81, an Environmental Impact Assessment Report is a mandatory requirement and the outcome of the assessment may be negative. It is expected that the Company's activities will have an impact on the environment, particularly at the time of advanced exploration and any mine development.</p> <p>It is in the interest of the Company to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws, in order to minimise damage to the environment and risk of liability. It is to be expected that there are certain risks inherent to the Company's activities, such as accidental spills, leakages or other unforeseen circumstances, which could subject the Company to environmental liability.</p> <p>Tanzanian environmental laws are dynamic and can change over time. The Company is unable to predict the effect of additional environmental laws and regulations that may be adopted in the future. Additional laws or regulations may materially increase the Company's cost of doing business or affect its operations. The cost and complexity of complying with any additional environmental laws and regulations may prevent the Company from being able to develop potentially viable mineral deposits.</p>
<p>Coronavirus (COVID-19)</p>	<p>The outbreak of the coronavirus disease (COVID-19) is impacting global economic markets. The nature and extent of the effect of the outbreak on the performance</p>

Risk Category	Risk
	<p>of the Company remains unknown. The Company's Share price may be adversely affected in the short to medium term by the economic uncertainty caused by COVID-19. Further, any governmental or industry measures taken in response to COVID-19 may adversely impact the Company's operations and are likely to be beyond the control of the Company.</p> <p>The Company's operations in both Western Australia and Tanzania may continue to be impacted in various ways including supply chain and operational challenges, possible disruptions in access, limited specialised workers' availability, and any cross border movement restrictions. The Company will however continue to operate with the best intentions of fulfilling commitments to Shareholders.</p> <p>In addition, the effects of COVID-19 on the Company's Share price and global financial markets generally may also affect the Company's ability to raise equity or debt or require the Company to issue capital at a discount, which may in turn cause dilution to Shareholders or the COVID-19 pandemic may also give rise to issues, delays or restrictions in relation to land access and the Company's ability to freely move people and equipment to and from exploration projects may cause delays or cost increases.</p> <p>The Directors are monitoring the situation closely and have considered the impact of COVID-19 on the Company's business and financial performance. However, the situation is continually evolving, and the consequences are therefore inevitably uncertain. In compliance with its continuous disclosure obligations, the Company will continue to update the market in regard to the impact of COVID-19 on its revenue channels and any adverse impact on the Company.</p>
Additional requirements for capital	<p>The Company's capital requirements depend on numerous factors. Depending on the Company's ability to generate income from its operations, the Company may require further financing in addition to amounts raised under the Offer. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its exploration programmes. There is however no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.</p>
Exploration Costs	<p>The exploration costs of the Company are based on certain assumptions with respect to method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainties and, as a result, the actual costs may materially differ from</p>

Risk Category	Risk
	these estimates and underlying assumptions will be realised in practice which may materially and adversely affect the Company's viability.
Exploration success	The Company's tenements in both South Australia and in Tanzania are at various stages of exploration, and potential investors should understand that mineral exploration and development are high-risk undertakings. There can be no assurance that exploration of the Company's tenements, or any other licences that may be acquired in the future, will result in the discovery of an economic ore deposit. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited.
Operational Uncertainties	As with mining and processing operations they are subject to uncertainty with respect to (among other things) ore tonnes, mine grade, ground conditions, recovery and unanticipated metallurgical issues, mining performance, milling performance, regulatory changes, accidents and other unforeseen circumstances such as unplanned mechanical failure of plant or equipment, storms, floods, bushfires or other natural disasters. The occurrence of any of these circumstances could result in adverse production or financial performance.
Tenement applications and licence renewal	<p>The Company cannot guarantee additional applications for tenements made by the Company will ultimately be granted, in whole or in part. Further the Company cannot guarantee that renewals of valid tenements will be granted on a timely basis, or at all.</p> <p>As at the date of this Prospectus, all Tenements and licences held in Tanzania and South Australia are currently in good standing.</p>
"Luhuma" Farm-in licences - Tanzania	<p>The Company entered into a Farm-in Agreement to earn up to 100% of the Luhuma Nickel Project in Tanzania. The Company currently has the exclusive right to explore and evaluate the licenses for a period of 12 months. The licenses are subject to various milestone payments, and ongoing expenditure requirements.</p> <p>As at the date of this Prospectus, the Company is yet to earn any interest in the project. The licences are at an early stage of exploration, and potential investors should understand that mineral exploration and development are high-risk undertakings. The required ongoing expenditures may not result in exploration success from the discovery of an economic ore deposit. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited.</p> <p>The Company is not the registered owner of the licenses and therefore the Company's ability to achieve its objectives in respect of the licenses is dependent upon it and the registered holder of the licenses complying with their obligations under the relevant earn-in agreements</p>

Risk Category	Risk
	<p>giving rise to the Company's interest, and on the registered holder complying with the terms and conditions of the licenses and any other applicable legislation.</p> <p>Any failure to comply with these obligations may result in the Company losing its interest in those licenses, which may have a material adverse effect on the Company's operations and the performance and value of the Shares.</p> <p>The Company has no current reason to believe that the registered owners of the Tenements will not meet and satisfy their respective obligations under the relevant agreements, the tenement conditions and other applicable legislation.</p> <p>There is also a risk of financial failure or default under the joint venture arrangements by a participant in any joint venture to which the Company is, or may become, a party. Any withdrawal by a joint venture party or any issues with their ability to perform the obligations due under the joint venture arrangements could have a material adverse impact on the financial position of the Company. There is also the risk of disputes arising with the Company's joint venture partners, the resolution of which could lead to delays in the Company's proposed development activities or financial loss.</p>

5.3 Industry specific

Risk Category	Risk
Environmental	<p>The operations and proposed activities of the Company are subject to State and Federal laws and regulations concerning the environment. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. It is the Company's intention to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws.</p> <p>Mining operations have inherent risks and liabilities associated with safety and damage to the environment and the disposal of waste products occurring as a result of mineral exploration and production. The occurrence of any such safety or environmental incident could delay production or increase production costs. Events, such as unpredictable rainfall or bushfires may impact on the Company's ongoing compliance with environmental legislation, regulations and licences. Significant liabilities could be imposed on the Company for damages, clean up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous operations or non-compliance with</p>

Risk Category	Risk
	<p>environmental laws or regulations.</p> <p>The disposal of mining and process waste and mine water discharge are under constant legislative scrutiny and regulation. There is a risk that environmental laws and regulations become more onerous making the Company's operations more expensive.</p> <p>Approvals are required for land clearing and for ground disturbing activities. Delays in obtaining such approvals can result in the delay to anticipated exploration programs or mining activities.</p>
Climate Risk	<p>There are a number of climate-related factors that may affect the operations and proposed activities of the Company. The climate change risks particularly attributable to the Company include:</p> <p>(a) the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. These examples sit amongst an array of possible restraints on industry that may further impact the Company and its profitability. While the Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Company will not be impacted by these occurrences; and</p> <p>(b) climate change may cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. All these risks associated with climate change may significantly change the industry in which the Company operates.</p>
Mine development	<p>Possible future development of a mining operation at any of the Company's projects is dependent on a number of factors including, but not limited to, the acquisition and/or delineation of economically recoverable mineralisation, favourable geological conditions, receiving the necessary approvals from all relevant authorities and parties, seasonal weather patterns, unanticipated technical and operational difficulties encountered in extraction and production activities, mechanical failure of operating plant and equipment, shortages or increases in the price of consumables, spare parts and plant and equipment, cost overruns, access to the required level of funding and contracting risk from</p>

Risk Category	Risk
	<p>third parties providing essential services.</p> <p>If the Company commences production, its operations may be disrupted by a variety of risks and hazards which are beyond its control, including environmental hazards, industrial accidents, technical failures, labour disputes, unusual or unexpected rock formations, flooding and extended interruptions due to inclement of hazardous weather conditions and fires, explosions or accidents. No assurance can be given that the Company will achieve commercial viability through the development or mining of its project.</p> <p>The risks associated with the development of a mine will be considered in full should the projects reach that stage and will be managed with ongoing consideration of stakeholder interests.</p>
Occupational health and safety	<p>The Company is committed to providing a healthy and safe environment for its personnel, contractors and visitors. Mining activities have inherent risks and hazards. The Company provides appropriate instructions, equipment, preventative measures, first aid information and training to all stakeholders through its occupational, health and safety management systems.</p>
Operational	<p>The operations of the Company may be affected by various factors, including failure to locate or identify mineral deposits, failure to achieve predicted grades in exploration and mining, operational and technical difficulties encountered in mining, insufficient or unreliable infrastructure such as power, water and transport, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, adverse weather conditions, industrial and environmental accidents, industrial disputes and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.</p> <p>In the event that any of these potential risks eventuate, the Company's operational and financial performance may be adversely affected.</p> <p>No assurances can be given that the Company will achieve commercial viability through the successful exploration and/or mining of its tenement interests. Until the Company is able to realise value from its projects, it is likely to incur ongoing operating losses.</p>
Safety	<p>Safety is a fundamental risk for any exploration and production company in relation to personal injury, damage to property and equipment and other losses. The occurrence of any of these risks could result in legal proceedings against the Company and substantial losses to the Company due to injury or loss of life, damage or destruction of property, regulatory investigation, and penalties or suspension of operations.</p>

Risk Category	Risk
	Damage occurring to third parties as a result of such risks may give rise to claims against the Company.
Commodity price volatility and exchange rate	If the Company achieves success leading to mineral production, the revenue it will derive through the sale of commodities exposes the potential income of the Company to commodity price and exchange rate risks. Commodity prices fluctuate and are affected by many factors beyond the control of the Company. Such factors include supply and demand fluctuations for precious and base metals, technological advancements, forward selling activities and other macro-economic factors.
Access	The Company's access to the tenements may be affected by landholder and pastoralist approvals, native title rights and/or the terms of native title agreements. While the Company intends to do those things necessary to minimise these risks, it cannot guarantee that the access it has to the tenements in which it has an interest will remain unfettered in the future.

5.4 General risks

Risk Category	Risk
Economic conditions and other global or national issues	<p>General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development, and production activities, as well as on its ability to fund those activities.</p> <p>Factors such as fluctuations in currencies, commodity prices, inflation, interest rates, national and international political circumstances (including outbreaks in international hostilities, wars, terrorist acts, sabotage, subversive activities, security operations, labour unrest, civil disorder, and states of emergency), natural disasters (including fires, earthquakes and floods), and quarantine restrictions, epidemics and pandemics may have an impact on the Company's exploration, development and production activities, as well as on its ability to fund those activities. The Company's future possible revenues and Share price can be affected by these factors, all of which are beyond the control of the Company or its Directors.</p>
Ukraine conflict	The current conflict between Ukraine and Russia (Ukraine Conflict) is impacting global economies and financial markets. The nature and extent of the effect the Ukraine Conflict may have on the Company's operations remains uncertain at this time. In the short to medium term, the Company's Share price may be adversely affected by the economic uncertainty caused by the Ukraine Conflict and the wider effect the conflict has on global economies and financial markets.

Risk Category	Risk
	<p>The Company's Share price may be adversely affected in the short to medium term by the economic uncertainty caused by the conflict between Ukraine and Russia and overall impacts on global macroeconomics. Given the situation is continually evolving, the outcomes and consequences are inevitably uncertain.</p>
<p>Market conditions</p>	<p>Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:</p> <ul style="list-style-type: none"> (a) general economic outlook in both Australia and Internationally; (b) introduction of tax reform or other new legislation, regulation or policy; (c) changes in exchange rates, interest rates and inflation rates; (d) changes in investor sentiment toward particular market sectors; (e) the demand for, and supply of, capital; and (f) the global security situation and the possibility of terrorist disturbances or other hostilities. <p>Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.</p>
<p>Litigation risks</p>	<p>The Company is exposed to possible litigation risks including intellectual property claims, contractual disputes, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position.</p> <p>The Company is not currently engaged in any litigation.</p>
<p>Dividends</p>	<p>Any future determination as to the payment of dividends by the Company will be at the discretion of the Directors and will depend on the financial condition of the Company, future capital requirements and general business and other factors considered relevant by the Directors. No assurance in relation to the payment of dividends or franking credits attaching to dividends can be given by the Company.</p>
<p>Taxation</p>	<p>The acquisition and disposal of Shares will have tax consequences, which will differ depending on the individual financial affairs of each investor. All prospective investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Shares from a taxation</p>

Risk Category	Risk
	<p>viewpoint and generally.</p> <p>To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for Shares under this Prospectus.</p>
Reliance on key personnel	<p>The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.</p>

5.5 Speculative investment

Prospective investors should consider that an investment in the Company is highly speculative.

The remuneration of an executive Director is decided by the Board, without the affected executive Director participating in that decision-making process. The

total maximum remuneration of non-executive Directors is initially set by the Constitution and subsequent variation is by ordinary resolution of Shareholders in general meeting in accordance with the Constitution, the Corporations Act and the ASX Listing Rules, as applicable. The determination of non-executive Directors' remuneration within that maximum will be made by the Board having regard to the inputs and value to the Company of the respective contributions by each non-executive Director. The current amount has been set at an amount not to exceed \$300,000 per annum.

A Director may be paid fees or other amounts (i.e. non-cash performance incentives such as Options, subject to any necessary Shareholder approval) as the other Directors determine where a Director performs special duties or otherwise performs services outside the scope of the ordinary duties of a Director. In addition, Directors are also entitled to be paid reasonable travelling, hotel and other expenses incurred by them respectively in or about the performance of their duties as Directors.

The following table shows the total (and proposed) annual remuneration paid to both executive and non-executive Directors as disclosed in the Company's 2020 and 2021 Annual Report.
